TRIP REPORT

Owner/Facility : J P Saad & Son, Inc.

Type of Facility : Former waste oil recycler

Project Number: 19-533

County : Davidson

City : Nashville

Date : December 1, 1994

Report by: Nancy Frazier, TDSF/NFO

Purpose of Visit : Meet with Fred Stroud, OSC EPA

Comments :

Arrived onsite at 1430 hours.

Met with Fred Stroud to discuss site status. The Saad Site Steering committee is meeting Monday December 5th to discuss removal options for the excavated onsite soil. Excavated soil was sampled and analyzed for disposal using TCLP parameters. The TCLP results indicated TCE eliminating the possibility of disposal in a local landfill.

Mr. Stroud stated Nick Crawford has collected samples RE: Dye Trace Study. EPA has been unable to contact him to obtain preliminary results.

Mr. Stroud met with the Alcoa PRPs today and they have agreed to finish the work onsite. Alcoa has agreed to excavate and remediate hot spots identified in the previous investigation. Alcoa is currently reviewing the EPA order. Alcoa sent environmental representatives from Texas to evaluate the site and anticipates beginning work as soon as possible.

Left site at 1500 hours.
